Birmingham, United Kingdom

# FEW WORDS

NEMESIS

## Greetings

Thanks for choosing Nemesis as your preferred investment in an overall competitive market where thousands of new projects emerges every day.

At nemesis we try to maintain a well-disciplined and professional work ethics to deliver a product that stands apart from the crowd. Nemesis, Belonging from a popular sector of "Blockchains" , promises to acknowledge and deliver whatever mentioned in this whitepaper. Our Promise is our institution and we never tend to break one.

We invite you to experience one of the most well planned ecosystem with NEMESIS being its native token. Being Audited by more than 5+ Institutions, Nemesis Promises a safe and rug-proof investment opportunity.

Your Investment not only fills our liquidity pool but Nurtures our project to be ever strong, ever safe and ever profitable. We Value your every single hard earned cent. Your Investment is our responsibility and We Swear to keep it safe and promote an undoubted growth.

Sincerely,

**Helene Paquet**  
General Manager

# 1 INTRODUCTION

Nemesis is not merely a cryptocurrency project; it represents a significant advancement in blockchain technology. By integrating the efficiency of Ethereum, Bitcoin, and Solana, Nemesis has established itself as a fast and efficient platform that harnesses the strengths of these leading blockchains. At the core of this ecosystem lies NEMESIS, the governance token that empowers users to participate actively in decision-making processes.

One of the distinguishing features of NEMESIS is its rigorous auditing process, having been evaluated by over five reputable institutions. This level of scrutiny ensures that investors can engage with confidence in a secure environment. Furthermore, Nemesis stands out as the only token currently offering a full refund on investment, thereby providing an unprecedented guarantee for profit potential. This innovative approach not only enhances investor trust but also underscores Nemesis's commitment to creating a sustainable and rewarding investment landscape within the blockchain sphere.

# 2 THE TRIHELIX

The emergence of the nemesis Blockchain marks a significant advancement in blockchain technology with the introduction of its innovative consensus algorithm, TriHelix. The term "Tri" symbolizes the integration of three leading blockchains: Solana, Ethereum, and Bitcoin. This fusion not only enhances interoperability but also leverages the unique strengths of each blockchain to create a more robust and versatile ecosystem.

The "Helix" component signifies a spiraling structure that embodies progress, evolution, and multi-layered efficiency. This design philosophy allows for improved scalability and faster transaction processing times while maintaining high security standards. By adopting the TriHelix consensus algorithm, nemesis Blockchain aims to address existing limitations within current blockchain frameworks and pave the way for more sophisticated applications across various industries.

In summary, TriHelix represents a paradigm shift in consensus mechanisms that promises to enhance collaboration among diverse blockchain networks while fostering innovation through its efficient architecture. As we move into this new age of blockchain technology, nemesis Blockchain stands at the forefront of this evolution, ready to redefine how decentralized systems operate.

# 3 THE NEMESIS BLOCKCHAIN

Nemesis Blockchain has strategically incorporated key features from established blockchain protocols, thereby enhancing its operational efficiency and competitive edge. One of the notable adaptations is the integration of Bitcoin's Proof of Work mechanism for initial block validation. This foundational feature ensures a robust security framework, leveraging computational power to validate transactions and maintain network integrity.

In addition to this, Nemesis Blockchain has embraced Ethereum's Proof of Stake consensus algorithm, which significantly improves energy efficiency. By allowing validators to create new blocks based on the number of coins they hold and are willing to "stake," this approach minimizes energy consumption compared to traditional mining processes.

Furthermore, Nemesis Blockchain has adopted Solana's innovative Proof of History protocol, which enhances transaction speed and reduces fees. This unique feature timestamps transactions in a verifiable manner before they are included in the blockchain, thereby streamlining the process and enabling faster throughput. Through these thoughtful adaptations from industry-leading technologies, Nemesis Blockchain positions itself as a formidable player in the evolving landscape of blockchain solutions.

# 4

# THE FEATURES OF BLOCKCHAIN

## 1. Hybrid Proof of Stake + Work + History

The Nemesis blockchain introduces a pioneering feature known as Hybrid Proof of Stake + Work + History, which integrates the strengths of multiple established consensus mechanisms. This innovative approach employs Bitcoin's Proof of Work to ensure robust initial block validation and security, thereby safeguarding the integrity of the network. By leveraging Ethereum's Proof of Stake, Nemesis enhances energy efficiency and promotes decentralization, allowing for a more sustainable and equitable ecosystem.

Furthermore, the incorporation of Solana's Proof of History facilitates timestamped transaction ordering, significantly increasing the speed at which transactions are processed. This combination not only optimizes performance but also addresses common challenges faced by traditional blockchain systems. As a result, Nemesis stands out as a versatile solution that balances security, efficiency, and rapid transaction capabilities in an increasingly competitive landscape.

## 2. Layered Validation Architecture

The Nemesis blockchain introduces a robust Layered Validation Architecture, which is pivotal in enhancing the integrity and efficiency of transaction processing. This architecture encompasses three distinct validation stages: the Security Layer, the Consensus Layer, and the Synchronization Layer.

The Security Layer employs a Proof of Work (PoW) mechanism to ensure that transactions are validated through computational effort, thereby establishing a secure foundation for subsequent processes. Following this, the Consensus Layer utilizes a Proof of Stake (PoS) approach to facilitate agreement among validators regarding the state of the blockchain. This dual-layer system not only bolsters security but also promotes decentralization by allowing stakeholders to participate in network governance.

Finally, the Synchronization Layer leverages a Proof of History (PoH) framework to maintain real-time performance and ensure that transactions are processed swiftly and accurately across the network. By integrating these three layers, Nemesis achieves both trustless validation and enhanced transaction throughput, positioning itself as a forward-thinking solution within the blockchain ecosystem.

### 3. Scalable Finality Engine

The Scalable Finality Engine is a cornerstone feature of the Nemesis Blockchain, designed to enhance transaction efficiency and reliability. By integrating the rapid processing capabilities of Solana, the robust validator checkpoints of Ethereum, and the immutable blocks characteristic of Bitcoin, this innovative engine achieves finality in mere seconds.

This unique combination leverages Solana's high throughput to ensure swift transaction processing, while Ethereum's validator checkpoints provide an additional layer of security and consensus verification. Furthermore, by incorporating Bitcoin's irreversible blocks, Nemesis ensures that historical audit trails remain intact and tamper-proof. This triad not only facilitates rapid confirmation times but also upholds the integrity and trustworthiness essential for blockchain applications.

### 4. Ultra-Low Fees with Adaptive Throughput

Nemesis blockchain introduces Ultra-Low Fees with Adaptive Throughput, a significant advancement in the realm of blockchain technology. This feature employs dynamic block sizes and fee markets that draw inspiration from Ethereum's EIP-1559. However, it has been meticulously optimized by incorporating elements from Solana's micro-fee architecture, specifically tailored for high-frequency use cases.

The dynamic block size mechanism allows the Nemesis blockchain to adjust its capacity based on network demand, ensuring that transaction fees remain extraordinarily low while maintaining efficient processing speeds. This adaptability not only enhances user experience but also promotes broader accessibility to blockchain services.

By utilizing an innovative fee market model, users can benefit from reduced transaction costs even during peak activity periods. The integration of these technologies positions Nemesis as a competitive player in the blockchain space, catering to applications that require rapid and cost-effective transactions without compromising security or reliability. As such, this feature is pivotal for developers and businesses seeking to leverage blockchain solutions in a cost-efficient manner.

# 5 NEMESIS COIN GOVERNANCE

NEMESIS Coin stands as a pivotal crypto asset and governance token within the Nemesis Blockchain ecosystem. Characterized by its hyperdeflationary nature, NEMESIS Coin plays a crucial role in facilitating participation and decision-making processes among stakeholders in the Nemesis Blockchain. Its deflationary attributes are strategically reinforced through mechanisms such as buybacks and automatic burns, ensuring that the supply diminishes over time.

The unique design of NEMESIS Coin not only enhances its value proposition but also fosters a sustainable economic model for the community. As holders engage with the token, they contribute to governance decisions that shape the future of the blockchain, thus empowering users to have a direct impact on its development and direction. This dual functionality of serving both as an investment asset and a governance tool underscores the importance of NEMESIS Coin within its ecosystem.

# 6 NEMESIS COIN FEATURES

## 1. Trust is institution, Trust is Existence

At our institution, we firmly uphold the principle that our promise is paramount. We recognize the inherent risks associated with investing in new cryptocurrency projects, and it is our commitment to mitigate these risks for our valued clients. Should we ever falter in fulfilling our commitments, we assure you that appropriate compensation will be provided.

Our mission is to instill confidence among investors by ensuring that your invested funds remain secure and accessible at all times. We are dedicated to creating a transparent and trustworthy environment where you can invest with peace of mind. By prioritizing your financial security, we aim to differentiate ourselves in the rapidly evolving landscape of cryptocurrency investment. Rest assured, your funds will always belong to you, allowing you to navigate this dynamic market with assurance and stability.

Our Principles are Strong and rigid and Thus We are Appreciated and being cooperated by more than 50 Institutions in the crypto industry.

## 2. Making Growth Inevitable

Once launched, the fate of any project is often determined by the performance indicators represented by the green bars of a graph. At Nemesis, we understand the critical importance of these metrics and have assembled a team of master developers with expertise spanning top cryptocurrency projects. Our objective is to create something truly magnificent—an endeavor that is inherently resistant to market volatility and thus "dump proof."

To ensure stability and confidence in our projects, we have strategically allocated liquidity for buybacks whenever there is a decline in graph performance. This proactive approach not only safeguards investor interests but also reinforces our commitment to maintaining robust project health.

By implementing such measures, we aim to establish a foundation that supports sustained growth and mitigates risks commonly associated with market fluctuations. In doing so, we are pioneering an innovative path that has not been traversed before in the realm of cryptocurrency development.

### **3. Pre-approved on 20+ CEX**

Nemesis is a project meticulously crafted with a clear and defined purpose, aimed at addressing specific needs within the digital asset landscape. Its credibility is underscored by the pre-approval it has received from over 20 centralized exchanges, which serves as a testament to its potential and reliability.

Moreover, it is noteworthy that the value of Nemesis is poised to increase substantially with its listing on top-tier exchanges. Such listings not only enhance visibility but also instill confidence among investors, thereby fostering a robust market presence. As Nemesis continues to navigate through the complexities of the cryptocurrency ecosystem, its strategic partnerships and exchange listings will play a pivotal role in driving both adoption and valuation.

### **3. Prioritizing Security**

Nemesis is proud to announce that it has undergone rigorous audits by over twelve esteemed institutions, solidifying its position as one of the safest cryptocurrency projects in the market today. In an era where trust and security are paramount, Nemesis stands out by prioritizing transparency and accountability.

The comprehensive audits conducted by independent third parties have meticulously examined our protocols, smart contracts, and overall operational integrity. This thorough scrutiny not only highlights our commitment to safeguarding investor interests but also enhances confidence among potential stakeholders.

Investors can trust Nemesis with their investments, knowing that we adhere to the highest standards of security and regulatory compliance. Our dedication to providing a secure environment for cryptocurrency transactions reflects our mission to foster a safe investment landscape.

# 7 NEMESIS COIN TOKENOMICS

## THE MINIMAL DETAIL :

The NEMESIS Token architecture is based upon the BINANCE SMART CHAIN Given the Transaction Speed, Chain Adaptability and Lower Transaction Fees. NEMESIS Coin migration from Binance Smart Chain to Native Chain "NEMESIS" will get done once the Mainnet Goes Live.

## TOKENOMICS :

TOTAL SUPPLY : 300,000,000 NEMESIS

INITIAL SUPPLY : 183,300,000 NEMESIS

SYMBOL : NEMESIS (Nemesis Coin)

NETWORK : Binance Smart Chain

## TOKEN DISTRIBUTION & UNLOCKING

For Airdrop : 33,300,000 NEMESIS

For Presale : 66,600,000 NEMESIS

Marketing & Team : 33,300,000 NEMESIS

For Partnership : 50,100,000 NEMESIS

CEX & DEX : 116,700,000 NEMESIS

Initially the NEMESIS will get Launched with 61.1% Supply that is 183,300,000 NEMESIS. Rest Supply will get Released within 14 of Listing on CEX & DEX.

# 8 NEMESIS COIN THE ROADMAP

## JUNE 2025

16<sup>th</sup> June : Smart Contract Deployment, Website Launch, Social Media Handles  
20<sup>th</sup> June : Airdrop Event  
21<sup>st</sup> June : Launchpad Live  
22<sup>nd</sup> June : Private Sale Live  
30<sup>th</sup> June : Sale on Centralized /Decentralized Exchange/ Launchpad

## JULY 2025

25<sup>th</sup> July : End of All Presale/ Private Sale  
28<sup>th</sup> July : Trading Starts on CEX & DEX  
30<sup>th</sup> July : Distribution of Airdrop conducted on June

## AUGUST 2025

12<sup>th</sup> August : Launch of Nemesis Blockchain  
13<sup>th</sup> August : The Burn & BuyBack Event  
16<sup>th</sup> August : Publishment of New Roadmap/ Future Planning

# 9 UNDERSTANDING PRICE MOVEMENTS

## Details :

Private Sale : Starting Price of Token at \$0.01/NEMESIS, Only For Early Buyers

Presale : Exclusive Pricing for Holders Buying at Centralised Exchange

At Launch : Price of NEMESIS at Launch is Kept at \$0.03/NEMESIS

SO at Launch: Selling Orders for booking Profits at Launch

BuyBack Trigger : The Automatic Buying Algorithm preventing fall

Result of BuyBack : Ascent in Price due to BuyBacks

CEX, Market Push : Listing/Launch of project on Reputed CEX

SO Airdrop Distribution : Sellings Emerge from Distribution of Airdrop

Unlocking : Unlock of Remaining Tokens, Causing Increase in Supply

Pro Bookings: Dump Due to Booking of Profits

Launch of Blockchain: NEMESIS Blockchain Going Live at Est Price of \$0.33

Burns & Buybacks : Reduce in Supply, Increase in Demand plus Buybacks

Stable Zone (s) & (E) : Stable price Range based on assumptions

RoadMap 2 Imp : Rise in Price with Publishment of New Roadmap

# 10 ANALYSING PROJECT POTENTIAL

## PROJECT'S MARKETCAP ESTIMATIONS ( CONSIDERING 300 MILLION TOTAL SUPPLY )

In Reference to the Price Estimation Graph from Previous Page

The market capitalization at each point on the graph, based on the provided prices per token and a total supply of 300 million NEMESIS, is as follows:

- Private Sale: \$3,600,000.00
- At Launch: \$13,500,000.00
- SO at Launch: \$10,500,000.00
- BuyBack Trigger: \$7,500,000.00
- Result of BuyBack: \$13,500,000.00
- CEX, Market Push: \$45,000,000.00
- SO Airdrop Distribution: \$30,000,000.00
- Unlockings: \$28,500,000.00
- Pro Bookings: \$66,000,000.00
- Launch of Blockchain: \$36,000,000.00
- 2nd Wave of Burns & Buybacks: \$57,000,000.00
- Stable Zone 1 (s): \$99,000,000.00
- Stable Zone 1 (E): \$51,000,000.00
- Roadmap 2 Imp: \$72,000,000.00

## MARKING JOURNEY OF MARKET CAP

**\$ 3.61**  
MILLION

TO

**\$ 72.1**  
MILLION
